

# Activity 3-2 - Finite-State Automata Definition Practice

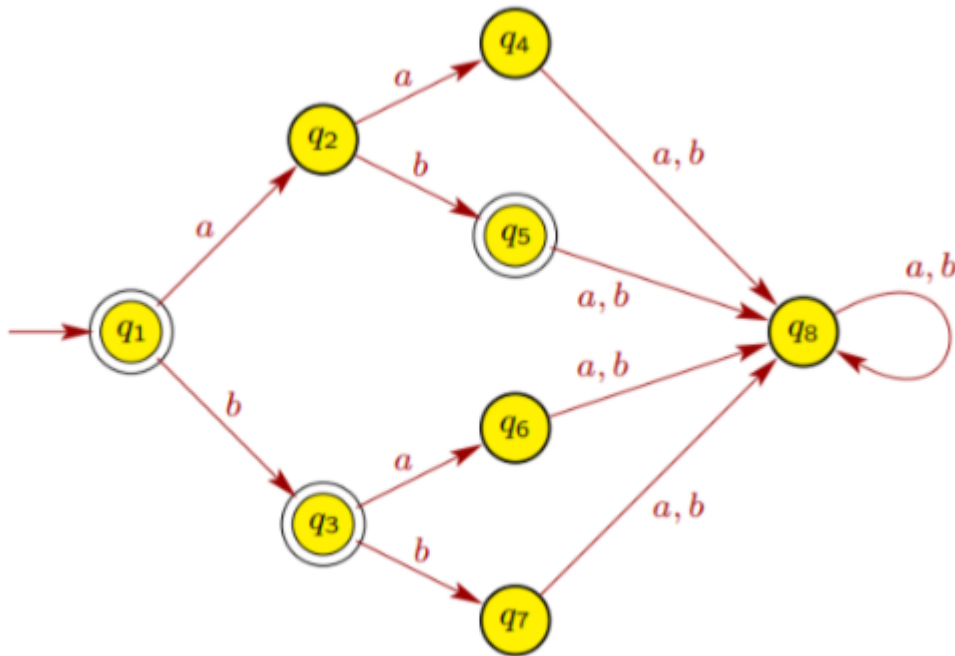

---

5 points each

## What to Do

---

Given by the following automata:

1. What are states (Q)?

YOUR ANSWER:

$Q = ?$

2. What is the alphabet ( $\Sigma$ )?

YOUR ANSWER:

$\Sigma = ?$

3. What is the start state ( $q_0$ )?

YOUR ANSWER:

$q_0 = ?$

4. What are the final states (F)?

YOUR ANSWER:

$$F = ?$$

5. Write all transitions in this notation:

$$T(state, input) \rightarrow nextstate$$

YOUR ANSWER:

$$T(?, ?) \rightarrow ?$$

.

.

.

6. Create the transition table.

## When to Submit It

---

Before next week class

## Advice

---

Check the examples in lesson 4!
