

Activity 3 - Review of Intelligent Assistants

In this activity, we'll review the basic concepts of Intelligent Assistants. This is important since I'll require you to have your own assistants as midterm project.

What to Do

In intelligent assistants or virtual assistants:

1. Discuss what is trigger word or wake word and give 1 example. (5 points)
2. Discuss what is commands and give 3 examples. (5 points)
3. Research the difference between speech recognition and voice recognition. Give examples. (10 points).

When to Do It

Before next week class.

Notes

- For question 1, 2 and 3, avoid copy-pasting from the internet, especially from your classmates.
- Follow general instructions, submit DOC or PDF only. Do not submit images such as JPG.

Advice

- For question 1 and 2, remember what we are programming in our laboratory schedule, OR you can research.
- For question 3, avoid very long answers, short sentences are enough. But clear and concise answers are important.
- If you have any questions, you can private message me at Facebook.
